Solar Works Inc. Named a SunPower Premier Dealer

First-of-Its-Kind Program Leverages Resources of SunPower to Improve Customer Service Across Dealer Network

February 1, 2007 – Solar Works Inc. of Montpelier, VT and Stamford, CT today announced that it has been selected as a SunPower Premier Dealer by SunPower Corporation (NASDAQ: SPWR), a Silicon Valley-based manufacturer of high efficiency, commercially available solar cells, panels and systems.

Dealers selected to participate in the SunPower Premier Dealer program have agreed to provide customers with superior levels of service and a comprehensive customer assurance program, including fast turnaround on customer inquiries, warranty and customer satisfaction tracking and participation in a post-installation site inspection program. Dealers in the program have also completed regular training in the specifications and installation of SunPower products.

“We have been selling and installing SunPower’s products with a great deal of success for some time now. We are very pleased to have been selected for this best in class program. The increased power output of SunPower’s highly efficient modules is a perfect fit for homes in the Northeast, particularly where aesthetics and roof space are an issue” said Tim Seamans, VP of Operations for Solar Works Inc.

“I’m pleased that our dealers share our enthusiasm for the Premier Dealer program and have agreed to join this groundbreaking initiative,” said Tom Werner, chief executive officer of SunPower. “Together, SunPower and SunPower Premier Dealers are raising the bar in the solar industry with higher value products and services.”

The program is a first-of-its kind nationwide initiative to support a network of solar power system dealers that sell, install and service SunPower products. SunPower is currently affiliated with more than 70 dealers across the U.S.

About Solar Works Inc.

Solar Works, Inc. (www.solarworksinc.com) is the leading solar electric systems integrator in the Northeast serving commercial, institutional and residential customers. Over the past 25 years, Solar Works has installed over 800 renewable energy systems. Solar Works has expertise in engineering design, project management, performance analysis, project financing and renewable energy credit programs. Founded in 1980, Solar Works is active in commercializing new technologies and developing renewable energy programs for both public and private sector clients.

About SunPower

SunPower Corp. (NASDAQ: SPWR) designs, manufactures and markets high-performance solar electric technology worldwide. SunPower's high-efficiency solar cells and panels generate up to 50 percent more power per unit area than conventional solar technologies and have a uniquely attractive, all-black appearance. SunPower's PowerLight subsidiary is a leading global provider of large-scale solar power systems, with over 100 megawatts installed. For more information on SunPower please visit the SunPower website at www.sunpowercorp.com. SunPower is a majority-owned subsidiary of Cypress Semiconductor Corp. (NYSE: CY).
